

ZOMBIE HUNTING GUIDE

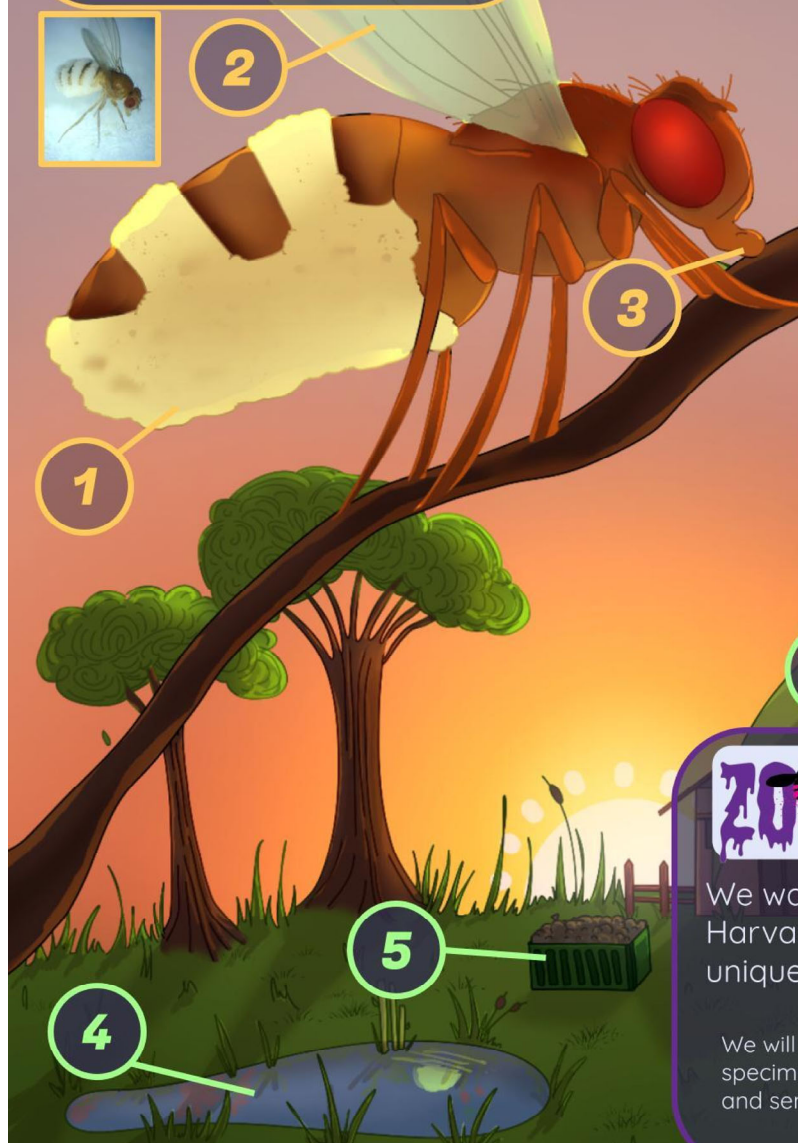

EL_{ab}YA

Entomophthora muscae is a fungus that manipulates flies at the end of infection, turning them into what scientists call "zombies".

WHAT TO LOOK FOR

- 1 Fungal material growing from abdomen, often in striped patterns.
- 2 Wings typically raised.
- 3 Proboscis often extended.
- 4 No movement

NO HEAVY WEATHER

MODERATE MICROCLIMATES

MONTHS WHEN FLIES ARE OUT IN YOUR AREA

OLDER ZOMBIES MAY HAVE FEWER SPORES AND APPEAR DEFLATED

WHERE TO LOOK

- 4 Near water sources.
- 5 Near dumpsters, or other stinky places.
- 6 Stuck to objects such as shrubbery or a trash can rim.
